

We have started a major programme of repair and maintenance of the Community Centre. Over the last two months, the outside has been redecorated, and following a major leak in the attic the cold water storage tank has been replaced with a new, sealed tank. The waste pipes in the kitchen have been renewed, which has now solved the problem of the awful smell that has plagued us for some time. The

flat roof at the front of the building has also been replaced and new guttering installed.

We are looking to completely redecorate the interior of the Centre over the summer school holidays.

Another serious problem has recently surfaced which requires fixing. There is a broken drain under the Ladies toilet which may require extensive work, again during the summer holidays, to minimise disruption to the Centre users.

Due to the age our defibrillator and a shortage of spares, we investigated an upgrade. Brian Swift, who checks the defib to make sure it is always "rescue ready", discussed this with Yvonne Hargreaves at Yorkshire Ambulance, who kindly offered us a loan machine. Since then, we now have a brand new machine gifted by Robin Hood Airport, located in the new cabinet at The Angel. Thanks to Yvonne for the loan, and Brian for his continued diligence.
